

I.G. Global Services Ltd.

ENVIRONMENTAL POLICY

I.G. Global Services Limited takes a close and responsible interest in, and respect for, the physical, economic and social environment on all projects in which it is involved.

It aims to contribute towards environment improvement and sustainable development by using best practice and innovation. Environmental impacts are assessed at every stage of the business process in consultation with clients, partners, designers, sub-contractors and local stakeholders to develop agreed solutions that are sympathetic to the environment and community.

The company ensures that in conducting its activities it will:-

- Comply with all legal requirements, as a minimum standard.
- Consider environmental impacts and sustainable options at all stages of the construction process.
- Prevent pollution and protect both the natural and the built environment.
- Reduce the effect of noise, dust, disturbance and inconvenience arising from its activities.
- Use raw materials and resources (such as energy and water) efficiently, through correct use, handling, storage and preservation.
- Further minimise waste through re-use or recycling and safely transport and dispose of waste.
- Respond promptly to any complaints from third parties.
- Engage with customers and professional, regulatory and institutional organisations to help raise environmental standards.
- Actively involve employees, partners, sub-contractors, suppliers and designers in promoting and improving its environmental performance.

This policy will be brought to the attention of all employees, made available to the public and reviewed on an annual basis.

B. Ihenachor
